PROFESSIONAL SUMMARY

Computer Science and Artificial Intelligence student specializing in cybersecurity and penetration testing, with hands-on experience in web application security, vulnerability assessment, network security, and threat detection gained through structured training programs, practical labs, and security projects. Skilled in identifying and validating security vulnerabilities using industry-standard tools, with a track record of completing multiple hands-on penetration testing and network security training programs. Seeking a Junior Penetration Tester / Security Analyst role to apply and grow these skills within a collaborative security team.

EDUCATION

Bachelor of Computer Science and Artificial Intelligence **2023 – 2027 (Expected)**
Benha University — Computer Science Department — Cairo, Egypt
GPA: 3.6 / 4.0

PROFESSIONAL EXPERIENCE

Vulnerability Analyst & Penetration Tester Trainee **July 2026 – Present**
Digital Egypt Pioneers Initiative (DEPI) — Remote

- Participate in an Infrastructure & Security training program focused on vulnerability analysis and penetration testing.
- Trained on networking fundamentals, network penetration testing, web application penetration testing, Android penetration testing, and prompt engineering.
- Applied practical security testing methodologies to identify vulnerabilities and analyze security issues across different environments.

Cybersecurity Trainee **May 2026 – December 2026**
Information Technology Institute (ITI) — Remote

- Completed Stage 1: Cybersecurity for Beginners — Mahara-Tech (35 hours), building foundational knowledge of cybersecurity concepts, threats, and security practices.
- Completed Stage 2: Network Infrastructure Summer Boot Camp (120 hours), covering Network Fundamentals, Advanced Networking, Ethical Hacking, and Cloud Essentials through practical technical training.
- Completed Stage 3: Cyber Talent CTF Bootcamp (24 hours), receiving hands-on training in Cyber Security Challenges across multiple security domains, followed by Capture The Flag (CTF) competition-based practical assessment.
- Applied practical security testing methodologies through hands-on challenges covering information gathering, scanning, vulnerability assessment, web application security, exploitation, and post-exploitation.

Teaching Assistant **August 2026**
iSchool — On-site, Egypt

- Selected as Teaching Assistant for DEMI Offline – 3rd Intake, supporting delivery of programming education for young learners.
- Independently delivered programming sessions, simplifying technical concepts and adapting explanations to different learning levels.

- Supported students through hands-on activities, problem-solving, and practical exercises, fostering an engaging and collaborative learning environment.

Network Security Trainee

July 2026 – August 2026

National Telecommunication Institute (NTI) — Remote

- Completed 120 hours of intensive network security training, achieving a 95% final score.
- Developed hands-on knowledge in SOC operations, network security monitoring, SIEM, security log analysis, incident detection and response, and threat hunting.
- Performed practical packet analysis using Wireshark and studied MITRE ATT&CK, malware analysis fundamentals, digital forensics, and security risk management.

WebApp Security Mentee

May 2026 – July 2026

RootX Academy — Remote

- Completed Web Application Security Mentorship – Level II, focusing on practical web security and penetration testing.
- Practiced exploitation of SQL Injection, XSS, Access Control, LFI/RFI, Path Traversal, SSRF, and CSRF vulnerabilities through hands-on scenarios.
- Strengthened vulnerability analysis and problem-solving approach by exploring multiple solution paths rather than relying on predefined payloads.

CERTIFICATIONS

- Cisco CyberOps Associate — Cisco, 2026
- Certified Cybersecurity Educator Professional (CCEP) — Completed 19 April 2026 (3 hours)

COURSES

- Cyber Security Bootcamp — Google Developer Groups (GDG), Benha University — 2–6 February 2025 (36 hours). Covered foundational and intermediate topics in cybersecurity through technical workshops and interactive sessions.
- Red Hat System Administration I — Completed 12 June 2025 (9 hours 11 minutes)
- Ethical Hacking — Completed 12 June 2025 (3 hours 29 minutes)
- Implementation of Computer Network Fundamentals — Completed 12 June 2025 (2 hours)
- Introduction to Network Security — Completed 21 April 2025 (1 hour 15 minutes)
- Computer Network Fundamentals — Completed 9 February 2025 (1 hour)

PROJECTS

Web Security Practice Labs

- Built and tested vulnerable web application scenarios to develop practical skills in vulnerability discovery, exploitation techniques, and web application security testing.

Bug Bounty Learning Journey

- Practicing reconnaissance, subdomain and endpoint discovery, parameter enumeration, vulnerability assessment, and web application security testing using industry-standard tools.

SKILLS

Programming: Python, C++, SQL, HTML, CSS, JavaScript

Operating Systems: Linux (Kali Linux, Red Hat Basics), Windows

Networking: TCP/IP, DNS, HTTP/HTTPS, DHCP, Routing & Switching, OSI Model

Cybersecurity: Web Application Security, OWASP Top 10, Penetration Testing, Vulnerability Assessment, Authentication & Authorization Testing, Linux Command Line Interface (CLI)

Security Tools: Burp Suite, Nmap, Wireshark, Nuclei, Katana, httpx, Subfinder, ffuf, Gobuster, SQLMap, Metasploit Framework, Git, GitHub, VirtualBox

Interpersonal Skills: Problem Solving, Communication, Teamwork, Leadership, Organization

Languages: English (B2), Arabic (Native)

VOLUNTEERING

Cybersecurity Core Team Member

Oct 2025 – Sep 2026

GDG on Campus Al-Azhar

- Contributed to the cybersecurity technical track by supporting the development and delivery of security-focused learning content, workshops, and community initiatives.
